

Pathology Report Summary

(please note that not all information is applicable to each individual case)

Tumor Type:

Use additional space below to specify multiple concomitant tumor types, or satellite tumor etc.

Tumor type: Other

Tumor size:

Margins: Negative Positive Close

Explain if applicable

Tumor Grade: Grade 1 Grade 2 Grade 3

Lymphovascular invasion: Not present Present

Cancer growth rate: Low Intermediate High

Test used: Ki-67 or S-phase fraction

Additional remarks or information for concomitant tumors other than the main described above:

Hormon receptors status:

Estrogen receptor-positive at % Or Estrogen receptor-negative

Or Allred score

Progesteron receptor-positive at % Or Progesteron receptor-negative

Or Allred score

HER2 status:

Positive Negative Borderline

Test used

IHC FISH SPoT-Light-HER2 CISH

Other, explain if applicable

Pathology Report Summary

Lymph nodes status:

Positive Negative Microinvasive disease only

Total lymph nodes sampled/removed

If applicable total lymph nodes positive

Pathological stage (Not the final stage):

For the tumor p For the lymph node p

Date of surgery:
